TITLE: System and method for automated remote previewing and purchasing of music, video, software, and other multimedia products

----- KWIC -----

DEPR:

Retail stores 3804 can avoid this situation by pricing their products more competitively than the automated product purchasing system, and by allowing customers using the automated product purchasing system to compare prices in real time. In one embodiment, this is accomplished by providing customers 3808 with a price list of products available in the retail stores 3804 so that customers 3808 can compare the in-store prices with prices received from the automated product purchasing system. In this embodiment, customers 3808 can enter a code into in-store system 3908 identifying a product so that in-store system can provide an in-store price for the product. The code can be keyed into in-store system 3908, scanned in (e.g., using a bar code scanner) or entered by other data entry means.

DOCUMENT-IDENTIFIER: US 5424524 A

TITLE: Personal scanner/computer for displaying shopping lists and scanning barcodes to aid shoppers

----- KWIC -----

CLPW:

means for downloading from another computer storing current price list for items available for purchase in a store, said downloading carried out via said communication means, and for storing in said memory said current price list downloaded from said other computer and also for storing in said memory a plurality of other price lists from other stores or older prices lists from the store to be shopped, and for comparing the prices on said current price list with a selectable one or more of said other price lists stored in said memory;

DETX:

[0018] Accordingly, the current invention allows consumers to scan any product's bar code, and compare prices for exactly the same item in other nearby stores, as well as in virtual sites on the internet or other global computer network. Thus, consumers will be able to determine the best price for the product after they had completed their price comparison and decided upon the purchase. This is so whether the product is where they found it, at a nearby location, or on the internet. At the same time, consumers will be able to find any manufacturer's coupons or discounts applicable to the product even if the discounts are not being made available at the purchase location chosen.
